
(a) the three channels peak in different places
650 nm
550 nm
450 nm
Airy scale: 1.75 / 1.56 / 1.37 μm
ratio (λ/550)^2/3: 1.118 / 1.000 / 0.875
|Ai|² / peak
distance across the fold (μm)
(b) colour of the caustic core
clear glass clear water
cobalt glass clear water
amber glass clear water
clear glass copper water
clear glass tea water
equal energy
solar 5778 K
warm 3400 K
cool 10 000 K
(c) colour down the band: the fringes themselves are coloured, and the medium decides which survive
clear, equal energy
clear, solar
clear, warm sun
cobalt glass
distance across the fold band (μm)
